FANTASTIC TASTE NO WATER NEEDED

CITRUS | ORANGE | SUMMER FRUITS

ISOGEL is a new type of energy gel that doesn't need to be taken with additional water. Just tear off the end and drink it neat. The clever part about **ISOGEL** is that it actually tastes and feels like a normal sport drink but still **delivers 24 grams of carbohydrate** per 60ml palm-sized sachet. It's not slimy, it's not like runny jelly and it tastes fantastic even in the later stages of racing or training.

Like all **High5** products **ISOGEL** has been extensively tested in the lab and with athlete groups who have given it a unanimous thumbs up. So no more waiting till the water station to get extra fuel on board, no more slimy tasteless jelly gloop, it really is just like a sports drink.

ISOGEL is available in: Citrus Plus (With Caffeine), Orange, and Berry.
